

WORKSHOPS

TEAMWORK

WITH MICROSOFT TEAMS

At the time of remote work, the automation of key business processes has become a necessity.

The Microsoft TEAMS platform has been designed to maximize the effectiveness of team collaboration.

Free workshops with our experts will help you to improve communication and teamwork!

Our workshops will help you discover all the features of Microsoft TEAMS. Together with our engineer, we will try to improve your business processes and plan their implementation in the right order. Finally, we will create a solution to be used in your daily work!

- ✓ Brainstorming - creating scenarios and applications to be implemented on the Microsoft TEAMS platform.
- ✓ Selection of the most interesting and best solutions. Establishing priority scenarios and applications.
- ✓ Determination of the principles of operation, selected scenarios and applications to be implemented.
- ✓ Implementation of the prototype of the scenario and application by the ISCG engineer.
- ✓ Discussion of the possibilities of development and extension of the Microsoft TEAMS functions.
- ✓ Recommendation of further actions related to the improvement of productivity in the organization.

Find new features!

Create scenarios of use to improve your productivity.

Use ready-made applications to improve your work.

Manage all your applications with Microsoft TEAMS.
