

# WORKSHOP

## IDENTITY SECURITY IN ORGANIZATION

Identity is today's control plane for digital transformation. Organizational barriers are blurring between who is in and out of your network.

Cloud apps and the increasing use of personal devices and remote work mean that data is no longer centralized behind traditional network security.

With identity attacks on the rise, this workshop will show you how to stop tomorrow's data breaches by securing identities today.

We will help you find identity risks happening now in your environment, gain insights on your application landscape, and improve your identity security posture.

### Protect user identities

- ✓ Identify potential risks related to identity and see opportunities for improvement.
- ✓ Receive a numerical rating of your identity security posture and see how it compares to similar organizations.
- ✓ Minimize expenses associated with password reset and helpdesk resources.
- ✓ Get a sample survey of apps your employees are using and if IT supports them or not.

### Why should you join?

- Get a rating of your identity security posture and see how it compares to your peers
- Receive a numerical rating of your identity security posture and see how it compares to similar organizations.
- Minimize expenses associated with password reset and helpdesk resources.
- Get a sample survey of apps your employees are using and if IT supports them or not.

### Why ISCG?
